

<input checked="" type="checkbox"/> Manufacturer Company name and address: Plasson Ltd., Kibutz Maagan Michael, Israel	Contact Hagai Itamari E-mail: itamarih@plasson.co.il	Phone no: +972-52-4799757 Homepage: www.plasson.com
Product name: Electofusion Fittings	Article no: 4XXXXXXXXXX	

Certificate for assessment against criteria of Byggvarubedömningen

Required information:

Content of chemical substances:

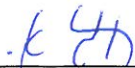

- ☒ Hereby is certified that the product/s specified above, with corresponding article numbers, do not contain¹ *substances that may not be found in products* according to Appendix 1.
- ☐ We regret to inform you that the above stated product/s contain *substances that may not be found in products* according to Appendix 1, see our specification in Table 1 (see below).
- ☒ Hereby is certified that the product/s specified above, with corresponding article numbers, do not contain¹ substances with properties according to *The Criteria*², in concentrations exceeding the limit for *Recommended*
- ☐ We regret to inform you that the above stated product/s contain substances with properties according to *The Criteria*², in concentrations exceeding the limit for *Recommended* but not above the limit for *Accepted* as we have stated in Table 1 (see below).
- ☐ We regret to inform you that the above stated product/s contain substances with properties according to *The Criteria*², in concentrations exceeding the limit for *Accepted* as we have stated in Table 1 (see below).

Nanomaterials³

The information is required for the possibility to assess the product as "*Recommended*".⁴ Nanomaterial content does not in other ways affect the assessment of the product, since there are no criteria concerning nanomaterials. There will be a comment given in the product page in Byggvarubedömningen.

- ☒ Hereby is certified that the product/s specified above, with corresponding article numbers, do **not** contain nanomaterials.
- ☐ Hereby is certified that the product/s specified above, with corresponding article numbers, **do** contain nanomaterials, see specification in Table 1.

☐ Table 1, contains classified information and may not be made public.

City and date: Maaga Michael	
Signature: 	<div style="border: 1px solid black; padding: 2px; display: inline-block;">PLASSON LTD.</div> Title: Technical Manager, marketing
Name in block letters: HAGAI ITAMARI	

This certificate must be signed by a duly qualified person and all 3 pages must be sent in to Byggvarubedömningen.

PLASSON LTD.

¹ These substances have not been added to the product at any time during production and to our knowledge should not be formed through reaction between substances in the product.

² Byggvarubedömningen – Assessment Criteria 2013-08-26 (approved by the Board of Directors 2013-08-26)

³ According to EU-commission definition; <http://ec.europa.eu/environment/chemicals/nanotech/index.htm#reach>

⁴ Decided by Board of Directors 2013-05-16.

Appendix 1

Substances that may not be found⁵ in products with the assessment Recommended

Substance Group / Substance	Example of properties
1. Arsenic and its compounds ⁶	Tox, Harmful to the environment
2. Brominated flame retardants	Pot. PBT/vPvB, PBT/vPvB
3. PFOA (perfluorooctaneacids)	Persistent, Bioaccumulating, probable Repr
4. PFOS (perfluorooctane sulfonate)	Pot. PBT/vPvB, PBT/vPvB
5. Organotin compounds	Pot. PBT/vPvB, PBT/vPvB, Tox, Harmful to the environment

⁵ These substances should not have been added to the product at any time during production and shall not be formed through reaction between substances in the product.

⁶ Arsenic, or arsenic compounds, should not have been added to the product. Such substances present as pollution in used raw material may not exceed 10 mg/kg. The concentration is set in accordance with regulatory requirements for soil quality so that accepted products will not add to background levels when used or deposited (e.g. sewage sludge according to SFS 1998:944 §20). The same concentration limit is also found in the overall guidelines for less sensitive land use (MKM) from the Swedish Environmental Protection Agency.
